

# SOL-ARK CELEBRATES ANOTHER RECORD QUARTER

On October 15th, we celebrated our quarterly success with an internal party to show appreciation to our employees and their hard work the past few months. During this time, we recap the quarter, discuss plans for the next one, and then have a great time with friends and family involved! Check out the video below to see how much fun we all had together as a team, and as a company.

# SOL-ARK OPENS NEW TEXAS-SIZED FACILITY

Sol-Ark opened its new facility in September, continuing on its mission to bring affordable solar to everyone. The facility will house offices, testing stations, and production lines all under one roof, with a MASSIVE increase in inventory storage space.

# NEW PRODUCTS COMING SOON!

## SMART LOADS 14 ENERGY MANAGEMENT SYSTEM

Sol-Ark's Smart Loads 14 is officially launching next quarter. Full specs will be available soon, but this product works with or without solar to do smart peak load shifting/shaving, and will be integrated with PV Pro, along with full comms. with Sol-Ark inverters.

**14 Circuits @  
100 amps EACH!**

## NEW HYBRID INVERTERS AND MORE!

We will be adding to our already-impressive lineup of inverters soon! Multiple new inverter products are coming early next year that will be perfect additions to this product line.

We are constantly innovating and improving, and our upcoming products will be no exception to this.
